PROJECTS

Safari Cars App

A marketplace mobile application to buy and sell cars, bikes, and accessories.

Available on : [Play Store](#), [App Store](#).

Key Features :

- Implemented **Google Sign-In** and **Apple Sign-In** for secure user authentication.
 - Enhanced app speed by **40%** through the implementation of **Lazy Loading** for optimized data fetching and performance.
 - Integrated **Ola Maps** for real-time location tracking and vehicle discovery.
 - Added **Razorpay** for secure and seamless in-app payments.
 - Developed a **Reels** section for showcasing short vehicle videos.
 - Enabled **Deep Linking** for direct screen navigation via shared links.
 - Designed **dynamic filters** to refine listings by brand, model, year, fuel type, ownership, and transmission.
-

Hash India – E-commerce App

Developed a B2B e-commerce application with secure payments, real-time order tracking, and optimized performance using Firebase.

Available on : [Play Store](#), [App Store](#).

Key Features :

- Developed a **category-based** catalog for easy product browsing and discovery.
 - Reduced memory usage by **50%** through **Dependency Injection** and efficient instance reuse.
 - Implemented **cart management** for seamless product add, remove, and update.
 - Enabled **real-time order tracking** within the app for improved transparency.
 - Added **brand-based filters** for efficient product search and selection.
 - Integrated a **credit system** allowing purchases based on admin-allocated credits.
 - Implemented secure payment options and transaction management using **HDFC Payment Gateway** for seamless and reliable transactions.
-

Reliant – E-Learning / Education App

An e-learning mobile application offering chapter-wise and lesson-wise courses, video lessons, study materials, paid access, and course renewal.

Available on : [Play Store](#), [App Store](#).

Key Features :

- Developed an e-learning application with course content organized chapter-wise and lesson-wise.
- Implemented course purchasing and **subscription/expiry management**, including expired course sections and course renewal options.
- Integrated **Razorpay** payment gateway for secure course purchases.
- Implemented course access control and locking mechanisms for unpaid or expired courses.
- Integrated **YouTube** video streaming for online lessons.
- Provided **PDF** study materials for course-related learning.
- Added **chapter-wise exams** and a **final exam** at the end of the course.
